

COUNTER FLOW, CF[®], EVAPORATOR THE NEW STANDARD

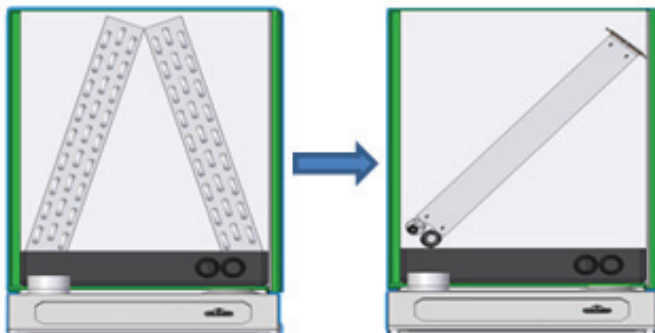

Developed using Modine's extensive experience as a CAB expert to solve one of the toughest challenges, the microchannel evaporator, CF.

For nearly 100 years, Modine has been the leader in technology and engineering in the HVAC&R industry. Responding to customer demands and the changing needs of the industry, Modine is proud to announce the addition of the counter flow, CF, evaporator; its new 2 row microchannel coil.

Designed for ease of application, energy efficiency and durability, the CF provides customers with a state-of-the-art solution for their residential and commercial indoor coil needs.

CF is the microchannel evaporator solution for the HVAC industry.

- Patented technology
- Higher SEER/EER
- Increased performance
- Reduced airside pressure drop
- Integrated distributor
- Addresses condensate management
- Uniform conditioning of air stream
- All aluminum construction addresses formicary corrosion concerns
