

COIL DEFENDER

Condensate Probiotic Pan Tablet

Condensate Probiotic Pan Tablet contains a slow release enzymes which will release over time and help the condensate tray of the air-conditioning unit to stay clean and free of blockages and odour.

FEATURES

- Non-toxic and safe to use in food environments
- Non corrosive
- pH neutral
- Can be cut and moulded to fit any space

BENEFITS

- 12 months protection to stop slime, mould and odour causing bacteria growing and blocking condensate line
- No specialised equipment needed
- Reduces potential blockages and water damage
- Combined with Coil Treatment to give total protection of the system and improves indoor air quality
- Reduces maintenance and cleaning procedures

COIL DEFENDER Related Products

Coil Protect is an antimicrobial treatment applied annually as a thin coating to indoor HVAC and refrigeration coils to stop bacteria, mould and slime from colonising the coil.

Enzymatic Sanitiser and Cleaner is a highly concentrated ONE STEP HVAC sanitiser and cleaner registered with the TGA to KILL COVID 19 ARTG 371654

Filter Treatment is a migrating antimicrobial which when sprayed on filters will stop colonisation on the fibres and extend the useful life of the filter.

DIRECTIONS FOR USE

- Please clean and remove all contamination from the drain pan before using tablet.
- Do not remove the tablet from the plastic bag. When in water, the plastic wrap will act as a glue. Preferred location - as far away from the drain as practical.
- Mould the tablet up to 1/5th of the thickness if needs to be positioned under the coil or in hard-to-reach spaces.
- Press the tablet down onto a wet pan. If the surface is not wet, add 5-10 drops of water onto the plastic wrap before pressing. Press until firmly the tablet is firmly glued.
- The plastic wrap may break when moulding. This does not affect the efficacy of the tablet.
